

Low-Temperature Silicon Oxidation using Oxygen-Plasma

Luke Cashwell

I. HELLO WORLD!

Hello World! Today I am potato learning \LaTeX . \LaTeX is a great program for writing math. I can write in line math such as $a^2 + b^2 = c^2$. I can also give equations their own space:

$$\mu^2 + \kappa^2 = \lambda^2 \quad (1)$$

$$\sum_{x=0}^{10} x^2 \Delta x$$

If I do not leave any blank lines \LaTeX will continue this text without making it into a new paragraph. Notice how there was no indentation in the text after equation (1). Also notice how even though I hit enter after that sentence and here \downarrow \LaTeX formats the sentence without any break. Also look how it doesn't matter how many spaces I put between my words.

For a new essay I can leave a blank space in my code.
